

Sampling Plan

- Giving the limited number of practicing Vedic management trainers and Vedic pundits, sampling under the non-probability method was deployed.
- Applying their professed experience as the criterion, 25 Vedic management trainers and top 10 Vedic pundits operating from Bengaluru were chosen.
- 25 Corporate managers were selected for the study under simple random probability sampling method.

Plan of Analysis

- The collected data has been analyzed with the help of statistical tools and techniques such as averages, percentages and Chi-Square test.
- The study also uses tables, diagrams and charts where necessary.
